

Position: INDUSTRIAL DESIGNER

Salary: \$45,000-60,000

Job Description:

Work with marketing, manufacturing, outside designers and suppliers to develop and design products. Combine creative and technical talents with research on product use, combined with consumer insights, to create the most functional and appealing product design.

Duties and Responsibilities:

1. Create concept sketches, detailed drawings, and initial technical drawings in SolidWorks, leading to Critical to Function (CTF) design.
2. Work with internal teams, outside designers and suppliers to execute new product designs.
3. Work closely with engineers and manufacturing on design and feasibility assessment.
4. Modify and refine designs, using working models and/or computer-aided design.
5. Organize and manage prototype creation for projects as applicable.
6. Work with entire Marketing team as necessary to help complete time sensitive projects.
7. Other duties as assigned.

Education and Experience:

- Bachelor's degree in Industrial Design required.
- 2 - 4 years of experience in the field of Industrial Design.
- Good understanding of plastics injection molding preferred.

Knowledge and Skills:

- High degree of accuracy and exactness.
- Excellent communication skills, problem solving, and analytical thinking.
- Proficient in using Microsoft Office.
- Proficient in Adobe Illustrator and Photoshop.
- Proficient in SolidWorks. Pro-E is a plus, but not required.
- Ability to rapidly convert ideas to concepts.
